Ultimate Incident Connectivity

CARBYNE

Carbyne is

Leading innovation company in public safety technology. Our company unifies the flow of life-saving information to emergency call centers onto one powerful platform.

By using Carbyne's innovative cloud-native tools like live video, instant chat, dynamic location and more, ECCs can now fully connect to an incident, sharing this package of rich media information with emergency units, increasing response efficiency and ultimately saving lives every day.

Operational Countries

210M

Population Covered

40%+

Reduction in Ambulance Dispatches

4.5M

Emergency Calls Generated

What your caller can't tell you, Carbyne can Provide!

Location

Carbyne's Auto Detect capabilities enable your ECC to receive the location and phone number of your caller before you even pick up the call. With over tens of millions of people served, Carbyne is the global leader in ELS Gateway.

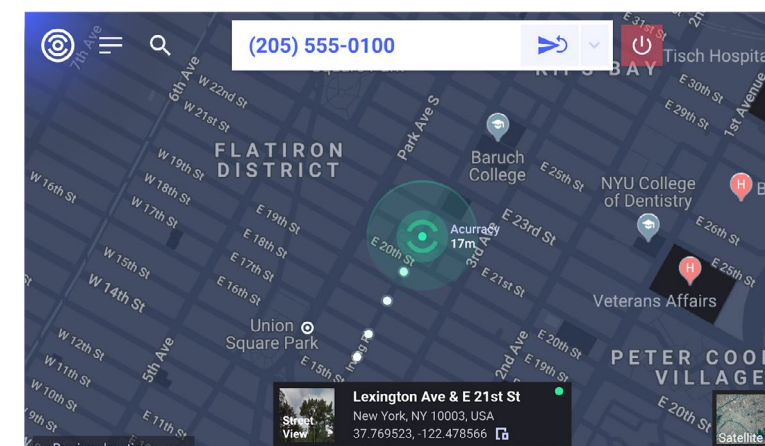

Live Video

The Carbyne platform creates a new shareable environment that allows telecommunicators to truly connect to an incident, increasing the confidence in decision making and creating better situational awareness for first responders.

Instant Chat

When a caller can't communicate verbally, instant chat can be the difference between life and death. Unlike traditional text to 911 solutions that experience delays in delivery, Carbyne's instant chat capabilities are immediate and reliable.

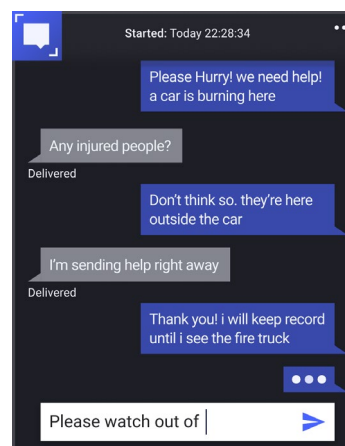

Location

Live Video

Instant Chat

First Responders Connection

Carbyne's First Responder's connection is the world's only feature to simultaneously connect a caller, ECC and first responders at the same time. With the control of street-level sights and sounds, first responders can experience the scene before entering it, increasing the safety of all that are involved.

Seamless Integration

Effortless Installation

Automated Location

Increased Efficiency

Reduced Call Time

No App Required
